Summary

Software Engineer with hands-on experience developing and troubleshooting REST APIs and web applications using Java, Spring Boot, React.js, and SQL. Experienced in backend development, API integration, database operations, application security, debugging, and Agile software development. Strong problem-solving and analytical skills with an interest in platform monitoring, incident troubleshooting, and reliable production systems.

Skills

Languages	Java, Python, JavaScript
Frontend	React.js, HTML5, CSS3, Figma, Tailwind CSS
Backend	Spring Boot, Spring Security, Hibernate, REST APIs
Databases	MySQL, PostgreSQL
Cloud & DevOps	Google Cloud (GCP), Git, GitHub, Jenkins (CI/CD), Docker, Kubernetes
Concepts	OOP, Microservices, LLM, RAG, Logging & Monitoring
Testing & Monitoring	Postman, JUnit, Prometheus

Work Experience

Associate Software Engineer **Oct 2025 – Sep 2026**
Oppty Techhub Private Limited

Responsibilities:

- Architected a full-stack HRMS using React.js, Spring Boot, and MySQL covering employee records, attendance, leave, and payroll workflows – reducing manual administrative effort by ∼40%.
- Designed and delivered 10+ production REST APIs with Spring Boot and Hibernate, implementing efficient data access layers and improving system response performance.
- Secured the application using Spring Security with JWT-based authentication and RBAC across 3+ user roles; managed codebase using Git in an Agile sprint workflow.

Data Analysis Intern **May 2024 – July 2024**
Allied Market Research

Responsibilities:

- Performed exploratory data analysis using Python and SQL to identify market trends and delivered actionable insights.
- Conducted primary and secondary research and structured findings to support data-driven decision-making across market segments.
- Visualised market trends and patterns using Matplotlib to support clear data-driven reporting.

Projects

DevConnect – Developer Collaboration Platform *2026*
React.js | Tailwind CSS | Java | Spring Boot | PostgreSQL | JWT

Role: *Full Stack Developer*

Responsibilities:

- Developed RESTful API endpoints using Spring Boot and Hibernate, handling resource lifecycle operations with backend validation on a normalized PostgreSQL schema.
- Implemented JWT-based authentication and role-based access control (RBAC) to secure API routes and enforce user-level permissions.
- Translated Figma wireframes into a responsive, component-driven React.js and Tailwind CSS interface with consistent design patterns across the application.
- Integrated the frontend, backend, and database layers into a cohesive full-stack application, managing data flow and consistency end-to-end.

TaskFlow – Team Task Management System *2026*
React.js | Tailwind CSS

Role: *Frontend Developer*

Responsibilities:

- Built responsive dashboards and UI screens using React.js and Tailwind CSS with a clean, reusable component architecture.
- Created dynamic UI features including task cards, progress indicators, and team views with seamless navigation across devices.
- Structured frontend workflows for task assignment, deadline tracking, and project views based on Figma wireframes.

Education

Gitam Institute of Technology **2021 – 2025**
B.Tech – Electronics and Communication Engineering *Bengaluru, India*

Vignan Junior College **2019 – 2021**
Higher Secondary (12th) *Guntur, India*
